

ADRF Public Safety Solutions

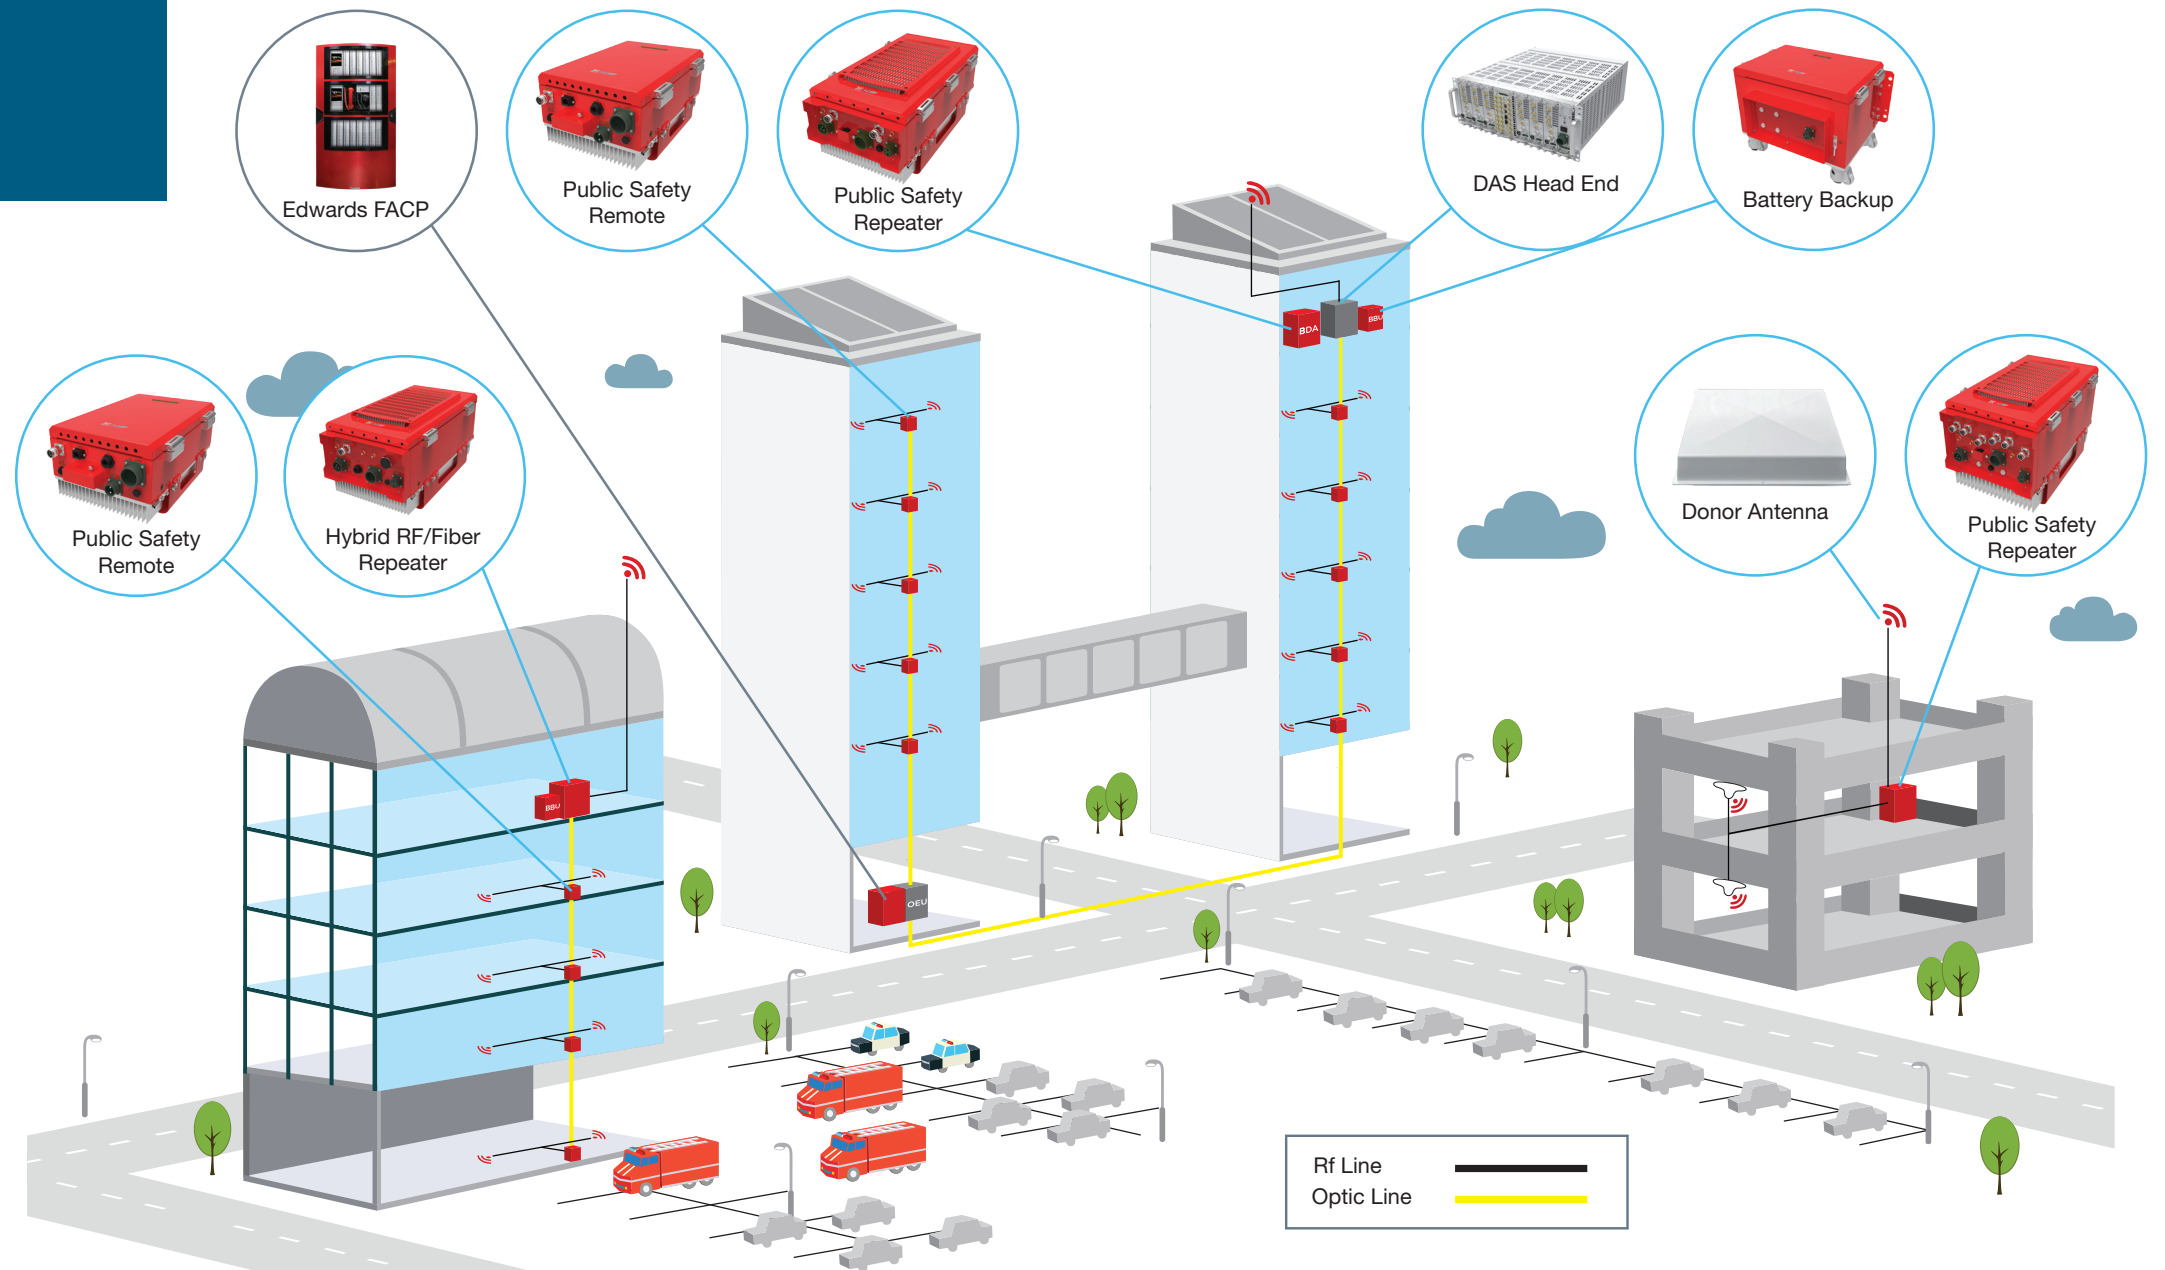

Mission Critical Communications Depends on ADRF

Public Safety Coverage

In the case of an emergency, it is crucial that all buildings support wireless communications for first responders, such as the police and the fire department. In fact, the International Fire Code (IFC) now requires full indoor National Fire Protection Association (NFPA) guidelines for coverage for public safety in all new or existing buildings.

Advanced RF Technologies, Inc. (ADRF) is at the forefront of providing code-compliant public safety wireless solutions that meet the rigorous municipal requirements for building occupancy. ADRF's products have been used for more than two decades improving critical communications in systems for first responders, as well as government, transit, commercial, education, security and military personnel.

ADRF's competitive portfolio of innovative Public Safety DAS and Repeaters are proven solutions to make buildings safer for first responders and deliver mission critical wireless service.

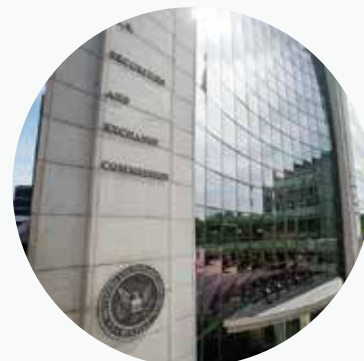

- Supports LMR, SMR, DMR, Public Safety frequencies for VHF, UHF, 700 (including FirstNet and public safety LTE), 800, & 900 paging
- Meets codes and standards from NFPA 72, NFPA 1221, IFC, and UL including UL60950 Listed & UL2524 Listed (June 2020)
- Supports dry contact alarms and easy integration to Annunciator & FACP
- Supports remote monitoring and control capability using web-based GUI including remote shutdown of repeater
- Type 4/Type 3R/IP66 compliant and fire engine red painted enclosure suitable for both indoor and outdoor environments
